travenreese3@gmail.com | +1(770) 713-0225 | linkedin.com/in/traven-reese-2001 | https://github.com/Travenedu

Dedicated Computer Science and Engineering student at Howard University that brings focus, determination, and innovation to the workspace. Exhibiting a positive attitude along with the willingness, and motivation to learn and develop new programs.

## Education

### **Howard University, Computer Science**

Aug 2020 – May 2024 | Washington, DC

Expected Graduation - May 2024

GPA - 3.81 (Senior)

#### **Relevant Coursework:**

Computer Science I, II	Intro to Computer
Applied Data Structures	Networks
Software Development	Intro to Cyber Security I
Studio	Fundamentals of
Intro to Engineering	Algorithms
Linux Lab (Bash)	Large Scale Programming
Computer Organization I, II	Cloud Computing
Careers in Tech	Database Systems
Theory of Computation	Intro to Machine Learning
Operating Systems	Discrete structures

## Experience

### **Google Tech Exchange Program @ Google**

January 2022 – May 2022

Selective educational program directed and taught by Google software engineers to provide students with an environment to develop technical skills, improve career readiness, and enable connections amongst those in tech.

### **Software Engineer Intern @ Google**

May 2023 – Present

Collaborating with Google Character's team to develop 3D model software for a VR & AR experience.

## Activities

### **Google in Residence Program @ Howard University**

August 2020 - December 2020

Prepares students through skill development, technical interview practice, career preparation, and shares industry best practices with faculty and administrators.

### **Developer Student Club @ Howard University**

August 2021 – present

Club members partner with different tech companies within the tech industry to provide opportunities and workshops to help members develop new technical skills and pathways.

## Skills

### **Technical Skills**

Python

C++

Linux (Bash)

Javascript

Typescript

Web Development(JavaScript, CSS, HTML)

Python Web Development(Django, Flask)

MongoDB

### **Non-Technical Skills**

Leadership

Project Management

Public Speaking

Team Collaboration

## Projects

### **Game Center**

June 2022

Independent Project using Python

Engineered a website portfolio to house the various python focused games I have created which include: Knights Run, Medieval Journey, and Space Explorer

### **Ecommerce Website**

March 2022

- Collaboratively created an e-commerce website for college students offering recommendations for cheaper everyday health and wellness items.

-Used Python, flask, HTML, CSS, and MongoDB

### **Social Media Website**

April 2022 - Present

- Individually created a Social media website allowing users to post opinions on different topics within the tech and engineering field

-Used Python, flask, HTML, Javascript, CSS, and MongoDB
